

# FOREST FIRES ARE MENACING TOWNS

## ALL THE PEOPLE OF PRENTICE ARE FIGHTING FLAMES.

Business is Entirely Suspended For the Purpose—Rains Have Decreased the Danger—Great Damage Done Through Wisconsin and Minnesota Timber Tracts.

Milwaukee, Wis., Sept. 30.—[Special]—The town of Prentice has been threatened by forest fires since yesterday morning, but squads of men have been patrolling the outskirts and have succeeded in keeping the flames back. As yet the fire has not reached the town and it seems as though the gravest danger was passed.

Work has been suspended to allow men to fight the fires. The town of Phillips has been saved by heavy rains, which decreased the fires, but they may spring up again.

The day was clear and fair. St. Paul, Sept. 30.—[Special]—Rain has come to rescue the timber districts and lumber towns of Wisconsin, South Dakota and Minnesota, and the forest fires that have already caused immense damage have been partly quenched. Showers are reported in the fire strip. It is impossible to estimate the loss caused by the flames. It will go into the millions. The report that five children were burned to death in Cumberland cannot be confirmed.

Chippewa Falls, Sept. 30.—[Special]—The forest fires are still creating great havoc throughout this portion of the state. No rain has yet fallen in the district tributary to this point and lumber companies are sending hundreds of men into the woods in an endeavor to save the standing pine. It is estimated that already 500,000,000 feet of lumber have been destroyed. The Wisconsin Central road is experiencing great difficulty in traffic as its wires are all down.

A movement has been started to assist the homeless farmers who have been burned out. Thousands are still fighting the flames, but are making little headway as everything is dry as tinder.

Chippewa Falls, Wis., Sept. 30.—Fire originating from burning forests destroyed half of Cumberland, a city of 1,500 people, Thursday, causing a property loss estimated at \$225,000. About twenty-five families are homeless.

Five children are reported burned to death. A large saw mill is among the buildings burned, throwing many out of employment. Rain saved the entire city from being burned.

Almena, a town of 300, and Paskin, a town of 200, both on the "Soo" line, this county, have been wiped out.

Clayton, of 300 people, is gone, and a large portion of Clear Lake, 600 inhabitants, was destroyed.

The wind was blowing here at the rate of forty miles an hour all Thursday afternoon and evening, fanning the fire in the forests until nearly every section of the woods in northern Wisconsin is ablaze.

No rain fell, although a storm threatened. The loss to lumbermen is enormous, as millions of feet of pine are going up in smoke every hour.

The city of Barron, on the Soo line, is entirely surrounded by fire, and farmers with their families are coming into the towns with whatever household goods could be saved.

The bridge on the Soo line, eight miles from Barron was burned and all trains are suspended in consequence.

Glenwood, a town of 2,000, between Chippewa Falls and St. Paul, has been saved after twelve hours' heroic work by the citizens.

Thousands of feet of hardwood timber surrounding the town were destroyed. Forty-eight farmhouses between Glenwood and Chippewa Falls were destroyed, including thousands of dollars' worth of stock, grain and machinery.

The greatest loss has been to standing pine and to the farmers. Telegraph and telephone wires are down in nearly every direction and it is impossible to get full details.

The fire departments of Chippewa Falls, Eau Claire and Menomonie have received appeals for assistance from nearly every small town in the fire district, and are prepared to go at a moment's notice where most wanted.

The railroad companies are sending crews in all directions to guard bridges and tracks.

Unless rain falls within the next twelve hours the losses will be enormous.

August Peterson, living near Estella, suffered the loss of his house, barn, stock and farm machinery, with no insurance. Crazed by his loss, he rushed into the burning forest, but was dragged out by his eldest son after both were terribly burned.

Rice Lake, Wis., Sept. 30.—The worst forest fire ever known in this part of the state has been traveling through the country at a rapid rate. Reports so far from the country are that sixteen farmhouses, together with barns and other buildings, have burned. The wind was blowing at the rate of forty miles an hour and the fire would blow and set fires for a distance of eighty rods.

It is thought that as many as eighty farmers have lost their buildings, hay, stock and grain.

Terre Haute Meeting Adjourns. Terre Haute, Ind., Sept. 30.—The Indiana Federation of Labor adjourned

Thursday to meet in Elwood next year. Among the resolutions adopted were the following: Extending sympathy to the Panama miners; for a law requiring barbers to receive state licenses; boycotting persons who permit advertisements of a certain brand of tobacco to be placed on their property; boycotting department stores; for free school books in the public schools; for a committee of five to confer with prison authorities as to amendments of the new anti-convict labor law; for state inspections of all boilers not inspected by insurance companies; for an amendment of city charters granting the privilege of doing all public work by the city direct without letting contracts.

# NOT A GOOD BASE BALL TOWN

Games Played Here Did Not Prove Very Profitable.

The numerous base ball games that have taken place in the city this summer at Athletic Park, have not been paying enterprises. H. J. Cunningham, who has personally managed most of the games, says that no money has been made from them to speak of.

The Waupun-Edgerton game was one of the best attended, and still the Edgerton management claimed that the crowd was only half what it should have been.

Janesville is not considered a good base ball town.

# PORK BRINGS POOR PRICES

The Hog Cholera Responsible For Depression in the Market.

Farmers through the county are complaining of the low price pork is now bringing in the market. The shipping of hogs by the hundreds from all parts of the county to the Chicago market on account of the cholera scare is having much to do with the present drop in the market.

Several farmers in town today report that the cholera continues to get in its fatal work. Local stock buyers are on the lookout for cholera infected pigs with every incoming load.

# DEFEATED BY CHICAGO UNIONS

# METHODISTS ARE IN CONFERENCE

BUSINESS TAKEN UP AT THE WAUPUN GATHERING.

Presiding Elders Make Their Annual Reports—Salaries of Bishops Placed at \$1,667 Annually—Lay Representation Will Provoke Much Discussion During the Meeting.

Rev. Walter A. Hall, of Court Street church, has gone to Waupun to attend the conference of the Janesville district of the Methodist church. Bishop Merrill was delayed in arrival and the business of the conference yesterday was chiefly informal. Rev. Henry Colman, pastor of the Oakland Avenue Methodist church of Milwaukee, and one of the oldest active ministers in the conference, was elected temporary president to serve until the arrival of Bishop Merrill. Rev. John Schneider, of Waunatona, was elected convention secretary. Robert S. Ingraham, of Rhineland, and formerly of Milwaukee, was made statistician and M. A. Drew, of Lyons, secretary.

The morning session was largely taken up by the reports of the presiding elders, which generally showed progress in strength of membership and financial condition. The question of payment of the amount apportioned the Wisconsin conference for the Board of Bishops, \$1,667, brought out quite a discussion, the sentiment being that the amount was proportionately excessive. A committee was appointed to report on the question.

During the morning Rev. C. P. Masden, transferred from the Colorado conference, was introduced.

The vote on the question of equal laity representation was set for 10 o'clock this morning, and every indication is that it will be favorable.

It appears to be the opinion that the case of Rev. Sabin Halsey was fully settled by the recent investigation, making it unnecessary to bring it up before the conference.

When Bishop Merrill arrived he was given a warm reception. He made a short address thanking the ministers and saying he was glad to be with them.

The annual communion service was held at 2 o'clock and was immediately followed by the conference sermon, which was preached by Rev. A. R. Grant.

Lumber Question Not Settled. Quebec, Sept. 30.—The Thursday joint session of the international conference was brief, but the subcommittees have been hard at work. It is likely the conference will adjourn before long to meet later in Washington.

Attorney General Joseph Martin of British Columbia says the Canadians should not surrender the British national right to the seal fisheries in the Bering sea. He is also interested in the question of reciprocal trade relations and desires that the American duty now imposed upon Canadian lead ores be removed. The lumber question is still in controversy.

Favor Reform in Currency. Akron, O., Sept. 30.—The resolutions adopted by the annual convention of the Ohio State Bankers' Association, without debate, affirmed the members' belief in the doctrine of sound money and contained the following paragraph in reference to currency: "Resolved, That we favor a speedy and judicious reform in our currency system."

The administration of the treasury department by Secretary Gage was indorsed and the war tax on the circulation of national banks was denounced as unjust.

# SPAIN WANTS TOO MANY CONCESSIONS

WISHES TO RETAIN ALL BUT CUBA AND PORTO RICO.

Her Commissioners Act as If They Were the Conquerors Rather Than the Conquered—War Will Be Renewed Unless They Return to Reason—The Cuban Evacuation.

Paris, Sept. 30.—[Special]—The Spanish commissioners here are beginning to realize that their is a conquered nation and cannot assume to dictate to the conquerors. They came here filled with plans for a settlement of the difficulties between the two nations upon terms "honorable" to Spain. That is, they did not propose to surrender any territory save Porto Rico and Cuba, and over the affairs of the latter island they proposed to exercise a practical suzerainty. They find, however, that if there are any terms to dictate the Americans will be the dictators. For a time they have funned, fretted and threatened, but representatives of other powers have at last convinced them that they will be compelled to make the best of a bad situation. They will accept whatever terms they can get, but will, of course, endeavor to make those terms as easy as possible.

# MERRITT MAKES REPORT

His Official Statement of the Occupation of Manila Made Public.

Washington, Sept. 30.—[Special]—Gen. Merritt's official report of the surrender of Manila was made public today. He says on his arrival he did not hold any communication with Aguinaldo because the president's orders were that the American powers of military oc-

MAJ. GEN. WESLEY MERRITT, United States Army.

cupation of the island were to be absolute and supreme and operative on the political condition of the natives. For these reasons preparations for an attack on the city were made without reference to the insurgents. Merritt gives in detail the battle of July 31, and speaks highly of the conduct of our troops. Of the battle of August 13 he has nothing new to tell.

# WHAT THE PHILIPPINES WANT

Not as Imperious as Aguinaldo's Conduct Would Imply.

Washington, Sept. 30.—[Special]—The Philippine delegates now here do not come, as was alleged, bearing demands from Aguinaldo, but suggestions as to the government of the islands, that are well worthy of consideration. Their first and most essential purpose is to have the treaty of Paris—the final treaty which will stand for all time—contain an article terminating absolutely the sovereignty of Spain over the Philippines. The disappearance of Spanish rule from the Philippines being assured, the next purpose of the Philippines is to have an opportunity to try their capacity for self-government, under American protection, if need be, during the transition period, or, if that seems inexpedient, then they want this government to assume the direction and control of affairs, by annexation or such other method as may best meet the condition of affairs.

The Americans may have yet to sustain their demands with a naval demonstration.

# WHO PAYS THE CUBANS?

Important Question Raised as to the Liability of This Nation.

Washington, Sept. 30.—[Special]—The question of the liability of the United States for the payment of the Cuban troops has arisen as a sequence of an appeal from Gen. Garcia for a loan for that purpose. Some officials here argue that the United States having accepted the assistance of the Cubans, has rendered itself liable for their pay and subsistence, and will have to foot the bill. The question is an important one, involving several million dollars.

She writes that a man answering the description of Armstrong came to her home and asked for something to eat. She says that when he left he wandered off in a half dazed condition, and pulled his hat down over his eyes. "This is a habit that my husband always had," said Mrs. Armstrong, "and I wouldn't be a bit surprised if he was in Nebraska today for that is his old home near Kennard."

The department responded in good time, and after a hard fight succeeded in extinguishing the blaze before great damage was done. A hundred dollars will replace the loss.

This is the second time within two months that the warehouse has been on fire, and Mr. Earle suspects that some enemy is bent upon his injury. There was every indication of incendiaryism in the fire of this morning as well as in the previous one. There was a large stock of leaf tobacco in the warehouse, and the insurance was ample. Mr. Earle will pay a good reward for the discovery of the incendiaries.

CAPTAIN ALLYN CAPRON, FIRST ARTILLERY, U. S. A. FROM HARPER'S WEEKLY.

AFTER A DRAWING BY FREDERIC REMINGTON. Reproduced from Harper's Weekly. By Permission. Copyright, 1898, by Harper &amp; Brothers.

Another good soldier, whose death, on September 18, at Fort Myer, Virginia, came as the result of the Santiago campaign, was Captain Allyn Capron, of the First Artillery. He had had typhoid fever, and died from a relapse. He was the father of Captain Allyn Capron, Jr., of the Rough Riders, who was killed at Las Guasimas on June 24, and the son

of Captain Allyn Capron, who was killed while commanding his battery of the First Artillery at Cherubusco, in the Mexican war. He was appointed to West Point from North Carolina in 1863, graduated into the artillery, and came to be regarded as one of the most accomplished officers in his branch of the service. An illustration taken from

Harper's Weekly and made from a field sketch by Frederic Remington shows Captain Capron at El Paso, during the campaign of Santiago. It has been stated (in the Sun) that two sons of Captain Capron enlisted in this war, and that one was killed at Guasimas and another died of typhoid fever. Another account says that two cousins of the Caprons, also named Cap-

ron, were among the volunteers who went to Cuba. The thread of fact cannot be clearly followed through these somewhat confusing stories, but it is evident that Captain Capron's widow has been sorely bereaved by the war. It is a solace to find it stated (in the Herald) that two younger sons are still left to her.

## Footville.

Footville, Sept. 30.—We are now enjoying some of the finest weather of the season and were it not for the hog cholera farmers would be happy. The social and dance of last week were both fully attended. Footville has not seen such a crowd for some time. The dumb social given Tuesday night drew a fair crowd but it was not found necessary to award many prizes. Arthur Busch is at home enjoying a brief vacation. ## MIRACULOUS CURE OF ASTHMA.

The statement published below confirms the claim of Dr. Schiffman that he has now discovered an absolute remedy for Asthma, a disease which has heretofore baffled the skill of the most noted physicians. Mrs. Mary Zachery, Pleasant Hill, La., says: "I have found your Asthma Cure a permanent cure for asthma, for which I used it seven years ago. I have never had the slightest return of the trouble since. I have also found your remedy excellent in bronchial affections. I shall ever have a feeling of gratitude for the benefits derived from your Cure." Packages of Schiffman's Asthma Cure may be obtained at all Druggists at 50c, and \$1.00 per package or by writing to Dr. R. Schiffman, box 804, St. Paul, Minn.

## VICTORY FOR CROKER.

Man He Had Selected Chosen for Governor of New York.

Syracuse, N. Y., Sept. 30.—Croker and Hill fought it out at the democratic state convention Thursday. David Bennett Hill lost and the Tammany boss won. As a result another Van Wyck is Croker's nominee for governor. His name is Augustus Van Wyck, justice of the supreme court and brother of the Tammany mayor of New York.

The platform dodged the silver issue. Not a word did it say about the currency question, and for that reason there is a fight on already. The silver democrats have declared war and say that they will put a third ticket in the field. They say they will do it at a meeting to be held in New York tonight. The silver men consider the ticket weak and are particularly incensed over the nomination of Van Wyck. They declare they will fight the ticket to a finish.

President McKinley's administration and the conduct of the war were attacked by the democratic platform. Roosevelt and Black's administration were both made targets of political fire, and the remainder of the lengthy platform is made up on state issues.

The full ticket is as follows: Governor, Augustus Van Wyck; lieutenant-governor, Elliot Danaforth; secretary of state, George W. Batten; comptroller, Edward S. Atwater; state treasurer, E. B. Norris; attorney-general, Thomas F. Conway; state engineer and surveyor, Martin Schenck.

## VOTE FOR PROHIBITION.

Liquor Men Thought to Be Defeated in Canada.

Toronto, Ont., Sept. 30.—The vote on prohibition taken in Canada Thursday appears to have been slightly in favor of the federal government passing such a measure and enforcing it in all the provinces. Owing to the great difficulty in getting complete returns of the vote from all parts of Canada an accurate idea of the result of the vote cannot be obtained, but the returns warrant the belief that the total in all the provinces gives a majority of between 5,000 and 10,000 in favor of prohibition. The vote was generally smaller in Ontario than expected, but in the province of Nova Scotia, where prohibition already prevails as a provincial measure, and in New Brunswick and the province of Quebec the vote was large.

In Ontario all the cities but two gave majorities against prohibition.

## Mission Receipts Fall Off.

Concord, N. H., Sept. 30.—The following financial statement of the American Missionary association, whose fifty-second anniversary is to be held here the last week in October, has been received here from the treasurer in New York, Mr. H. W. Hubbard:

"The current receipts of the association for the five years from 1893-'97 to 1897-'92 inclusive were \$1,064,044, and from 1891-'92 to 1896-'97 inclusive were \$1,658,884, a decrease these last five years of \$305,060. This decrease in receipts caused a burdensome debt and a curtailment of expenditures crippling to the work in all its departments. A cut in expenditures brought the debt down to \$43,345, and during the year just closing there has been a further cut in expenditures which will reduce the present debt to about \$25,000."

## Ultimatum Sent to Sultan.

Athens, Sept. 30.—The joint note of the powers, which has been presented to the sultan, demands that the Turkish troops and officials be withdrawn from Crete during October.

Paris, Sept. 30.—It is stated with some authority that a joint ultimatum from Great Britain, France, Russia and Italy was presented to the sultan Thursday, insisting that order be restored in Crete, or otherwise the powers would take the measures necessary to establish order in the island.

## Governor Smith May Die.

Los Angeles, Cal., Sept. 30.—There is no change for the better in the condition of Gov. Smith of the Soldiers' Home at Santa Monica, who was shot and badly wounded by Albert M. Bradley, an inmate of the home. The physicians are anxious concerning Gov. Smith's condition, and they fear he may not recover from the wounds. Reports from the home show no change.

## Celebrate Independence Day.

Manila, Sept. 30.—The declaration of independence was ratified at Malolos Wednesday amid great festivities. A review of the troops was held, speeches and recitations were delivered. The feature of the ceremony was the address of Aguinaldo. Many foreigners attended the state ball, which was given in the evening, but no American officials were present.

## To Control Flour Mills.

Milwaukee, Wis., Sept. 30.—The syndicate which is to control the leading western flour mills has been practically completed. This new company is to have a capital of \$40,000,000, and is to be completed at once.

## Reports 731 Fever Cases.

Washington, Sept. 30.—Following is the sick report received from Gen. Lawton at Santiago Thursday: "Fever cases of all kinds, 731; total sick, 1,151."

## DANGER IN SODA

Serious Results Sometimes Follow Its Excessive Use

Common soda is all right in its place and indispensable in the kitchen and for cooking and washing purposes, but it was never intended for a medicine, and people who use it as such will some day regret it.

We refer to the common use of soda to relieve heartburn or sour stomach, a habit which thousands of people practice almost daily, and one which is fraught with danger; moreover the soda only gives temporary relief and in the end the stomach trouble gets worse and worse.

The soda acts as a mechanical irritant to the walls of the stomach and bowels and cases are on record where it accumulated in the intestines, causing death by inflammation or peritonitis.

Dr. Harlandson recommends as the safest and surest cure for our stomach (acid dyspepsia) an excellent preparation sold by druggists under the name of Stuart's Dyspepsia Tablets. These tablets are large 20 grain lozenges, very pleasant to taste and contain the natural acids, pepsines and digestive elements essential to good digestion, and when taken after meals they digest the food perfectly and promptly before it has time to ferment, sour and poison the blood and nervous system.

Dr. Wuerth states that he invariably uses Stuart's Dyspepsia Tablets in all cases of stomach derangements and finds them a certain cure not only for sour stomach, but by promptly digesting the food they create a healthy appetite, increase flesh and strengthen the action of the heart and liver. They are not a cathartic, but intended only for stomach diseases and weakness and will be found reliable in any stomach trouble except cancer of the stomach.

All druggists sell Stuart's Dyspepsia Tablets at 50 cents per package.

## Blue and Gray Commingle.

## Fanny Davenport Late to Rest.

Boston, Mass., Sept. 30.—The funeral services of Fanny Davenport were held at Trinity church here Thursday. Interment was at Forest Hill cemetery. Joseph Jefferson was one of the honorary pallbearers.

## SINGULAR STATEMENT.

From Mrs. Rank to Mrs. Pinkham.

The following letter to Mrs. Pinkham from Mrs. M. RANK, No. 2,354 East Susquehanna Ave., Philadelphia, Pa., is a remarkable statement of relief from utter discouragement. She says:

"I never can find words with which to thank you for what Lydia E. Pinkham's Vegetable Compound has done for me.

"Some years ago I had womb trouble and doctored for a long time, not seeing any improvement. At times I would feel well enough, and other times was miserable. So it went on until last October, I felt something terrible creeping over me, I knew not what, but kept getting worse. I can hardly explain my feelings at that time. I was so depressed in spirits that I did not wish to live, although I had everything to live for. Had hysteria, was very nervous; could not sleep and was not safe to be left alone.

"Indeed, I thought I would lose my mind. No one knows what I endured. "I continued this way until the last of February, when I saw in a paper a testimonial of a lady whose case was similar to mine, and who had been cured by Lydia E. Pinkham's Vegetable Compound. I determined to try it, and felt better after the first dose. I continued taking it, and to-day am a well woman, and can say from my heart, 'Thank God for such a medicine.'"

Mrs. Pinkham invites all suffering women to write to her at Lynn, Mass., for advice. All such letters are seen and answered by women only.

## GOLD DEMOCRATS BARRED

Editor Usher of the La Crosse Chronicle, holds that no democrat can consistently or even honestly attend the so-called democratic caucuses. He says:

"Some of the gold democrats who talk about going to the caucuses and making effort to elect delegates to the assembly and county conventions who are not silver men, greatly misapprehend their opportunity. No man can vote at a democratic caucus, under the law, if he is challenged without taking oath that he voted the 'regular' democratic ticket at the last general election. It is plain, therefore, that a man who did not do that and who does not intend to do it this year, would be dishonest in the highest degree to attempt to vote in a democratic caucus. If an honorable man votes in a party caucus, under the present law, he is bound to support the convention nominees that are the ultimate result of the caucus nominations. It will therefore be seen that a gold democrat who does not intend to swallow his free silver and Chicago platform scruples, has no business in a democratic caucus as at present conducted. The failure to understand this aspect of the situation has led some gold democrats to blame themselves for not attempting to control the late democratic state convention. Unless a man intended to submit to free silver if he failed to carry the convention against it, he had neither a legal nor a moral right to take the first step. He had no business to vote in the caucus, much less to be a delegate to the convention. So long as the present caucus law stands the gold democrats are barred, if they maintain their integrity."

The sick at Camp Thomas have so far recovered that the latter hospital is to be closed. With the coming of cooler weather, the "frightful mismanagement of the army camps" seems to decrease in an astonishing degree.

Mrs. Lillian Russell-Braham-Solomon-Perugini is to marry Jesse Lewisohn, of New York. It would seem more appropriate in these piping times of war, if Lillian would splice some man with an American name.

J. T. Gray, of Fox Lake, is a lucky man. He stopped off in Oshkosh while on his way north to buy land and escaped with his life—while the pickpockets only got \$500 of his money.

Negotiations seem to be progressing. Corbett and McCoy have engaged in a saloon brawl.

Secretary of State John Hay took the oath of office today and will assume his

duties tomorrow. The secretary of state's office seems to be in the Hay Day of its usefulness.

Senator Mason has been "feeling the pulse" of the Illinois soldiers and says that many who were anxious to be mustered out are now equally anxious to get back into the service.

The correspondent who sent the Chicago Tribune a sensational story to the effect that a suicide club existed in Madison, was discharged by that paper as as the facts became known.

Don't lose sight of the fact that a vote for a democrat is a vote for the Chicago platform, socialism, anarchy, free silver and all.

Theodore Roosevelt's popularity lies in the fact that he is thoroughly American—frank, honest, unassuming, brave and conscientious.

M. Zola is having a lively time. Now they propose to sell his house on a judgment for libel rendered against the novelist.

It is "Lillian Russell" on the mimic stage, but on the stage of life it seems to be Lillian Hustle—for a new husband.

Coal is selling at Milwaukee for \$5 per ton, and dealers have a good supply on hand.

## WANT CARGILL BROS. TO KEEP ELEVATOR

## MIDWINTER FAIR COMMITTEE TAKES ACTION.

Grain Market Has Been Improved Greatly During the Last Year—Rent Will Be Paid by Popular Subscription—Plans for the Poultry Show.

Members of the Midwinter Fair committee met last evening to consider the elevator question. The first year of the Cargill elevator lease is about up, and the question for consideration was, what steps should be taken to continue it. The committee was unanimous in declaring that the Janesville grain market had been greatly improved during the last year. The matter of raising money to pay the rent of the elevator was placed in the hands of a committee headed by J. L. Bostwick.

Several questions regarding the Midwinter Fair were left for another meeting. A big poultry show may be added to the fair this winter.

## CHANCE MEETING IN BATTLE.

## Men from Opposing Armies Rush Into Each Other's Arms.

Get an old soldier started and he can reel them off by the yard. Here is one of their stories, according to the Philadelphia Times: "During Stonewall Jackson's first valley campaign, and the day before the battle of Cross Keys, I was standing," said an ex-confederate officer, "with several other officers of Elwell's division under the shade of a clump of trees in an old field overlooking a deep cut in the road through which the troops were marching. Suddenly I observed Maj. Bob Wheat, the famous commander of Wheat's battalion of Dick Taylor's Louisiana brigade, looking directly forward at a lot of federal prisoners approaching under guard. Wheat was a most magnificent specimen of manhood, and, guided by his intense gaze, I soon singled out among the prisoners the object of it, a man of like proportions to himself. In a moment more Wheat had rushed down the bank with outstretched arms, exclaiming: 'O, yes, I thought that was you giving us so much trouble.' The prisoner opened wide his arms and rushed to meet Wheat in an embrace which showed to us onlookers how tender must have been their relations in the past and how great their friendship still. After a long embrace Wheat told his friend to march on to Richmond and he would see that he was well cared for and soon exchanged. Then, turning to us, Wheat explained that the federal officer was Col. Windham, an Englishman, who had served with him on Gen. Abusana's staff in the Garibaldiian struggle for Italian freedom."

## Curious Old Coin.

John Lavelle of Janesville, Mich., while at work in his garden found a copper coin, which is a good deal of a curiosity. The inscription on one side of the coin reads: "My Currency, My Glory." The reverse side of the coin reads: "Perish credit, perish commerce." "Down with the bank," "My victory." A good-sized porker is pictured in the center of the piece, and the reading matter, stamped on the side of the animal is so obliterated as to make it unintelligible. The coin is evidently a relic of a campaign when finances were as prominent as they have been in some of the later years.—Ex.

Jerry W. Thomas of Polkville, Ky., has filed a petition in the United States court praying to be declared bankrupt. Some time ago Miss Lucy Garrison sued him for \$10,000 damages for breach of promise and after a bitterly fought trial was awarded a judgment for \$4,000. Since then she has made many efforts to collect the money, but Thomas has managed to escape payment. His petition is his final and greatest stroke in that direction. He recites in the document that he desires to be relieved of the liability. His schedule shows his assets to consist of three suits of clothes and a watch.

**Centrifugal Oil Saver.**  
Modern lathes and similar tools use great quantities of oil, and this is collected as it comes from the machine. It is full of chips of metal. To purify it the oil is placed in an apparatus which whirls it rapidly around. ## BICYCLE RACES THIS AFTERNOON

### GOOD PROGRAM CARRIED OUT AT RACE TRACK.

Some of the Fastest Riders in This Section of the State Participated—A Fair Sized Crowd Witnesses the Events—Many Cyclers Rode in From Adjoining Towns.

A cycle racing program that proved to be in every respect all that was claimed for it, was carried out at the Driving Park this afternoon under the auspices of the Janesville Cycling club.

The day was an ideal one and one more perfect for cycle races could not have been wished for. From early morning till the races were called wheelmen astride their favorite steeds began to arrive from the adjoining towns. At 2:30 o'clock the races were called and many fast ones lined up for the work.

Good Men Were There

Beloit, Rockford and Milwaukee had good men here as did also Fort Atkinson, Chicago and Jefferson. Between the races were several extra events that were given to the delight of those present.

Grant Taylor, the well known sprinter, ran a 200 yard race with a cyclist, who made the distance ahead.

Camp Dean, of the town of Avon, went an exhibition mile as a one legged rider.

Samuel Eastman, of Rockford, went a quarter and a mile to break the track cycle record of 2:12.

The Results

The events resulted, as far as completed up to the time of going to press as follows:

First race, 1/4 mile open—Nat McDonald, Milwaukee, first; A. E. Alverson, Rockford, second; K. Savage, Rockford, third. Time 35 seconds. A strong wind was blowing.

Don't think for a moment that Gold Medal flour is second. It's the finest patent flour on the market; only one as good and dozens of brands inferior. You can buy it now at \$1 per sack. Sanborn.

Second race, 120 yards—Grant Taylor, foot race against Eastman, of Rockford, on wheel. Taylor won. Time 11 1/2 seconds.

Third race, one-half mile open—McDonnell, Milwaukee, first; K. Savage, Rockford, second; A. E. Alverson, Rockford, third. Time 1:12.

Third race—Camp Dean, the one-legged cyclist, rode an exhibition mile in 3:14.

NEWS OF PERSONAL NATURE

BRAVERY OF WAR SURGEONS.

Examples of Remarkable Work in the Afridi Campaign.

From the London Lancet: When the medical history of the last war in India is written it will prove interesting reading. There were many difficulties overcome and hardships endured, with the usual element of danger. A good instance of this was when General Woodhouse was wounded early in the war. A bullet struck him on the thigh passed down below the knee, broke into pieces and lodged. The Roentgen ray apparatus revealed the exact conditions and it was determined to extract the pieces. In the middle of the operation, artificial light being used, the Afridis crawled up and suddenly blazed into the tent sending thirteen shots through the canvas. Now that might have been a very disturbing circumstance and apt to interfere with the perfect application of the aseptic form of surgery. And what happened? Nothing. The operation went on and was as successfully completed as if there were no Afridis within 100 miles. As usual, we had many examples of great personal bravery and devotion to duty in the midst of danger. Surgeon Captain Beys arrested hemorrhage under a hot fire, and Sir William Lockhart, speaking of the incident, said no one ever better merited the reward of the Victoria cross than he. He got nothing; but that is another story. Another medical officer greatly distinguished himself, Surgeon Lieutenant Hugo.

CAT Saves Baby's Life.

A pet cat saved the life of an infant near Hooker Glen, N. Y., the other day by killing a large rattlesnake which was approaching the baby. The mother, Mrs. Robert Snow, had taken the child a short distance from her home and seated it on the grass while she picked berries. A large pet cat accompanied them, and the mother of the babe, alarmed at the rattle of the snake, turned around just in time to see the cat seize the reptile as it was about to attack the babe. The cat killed the snake instantly within two feet of where the child was sitting.

Safety from Lightning in Cities.

The fear of lightning is almost universal, but the number of deaths caused by it is small. Dwellers in cities are even safer than those in the country, since statistics have shown that on the average four-fifths of the deaths from lightning occur in rural localities. The innumerable electric wires, the many grounded water pipes, and the metal roofs of cities are undoubtedly the chief elements of their safety in this respect.

Most of the matches have been decided not by long drives but by the play close to the hole.

## HAS A NEW THEORY.

HEART NOT THE MOTIVE  
POWER OF LIFE.The Blood Circulates by Force of In-  
halation of Oxygen—Chemical Action  
and Not Heart Pumping—Dr. Roder-  
mund the Discoverer.

R. M. J. RODERMUND of Wisconsin has propounded a new theory as to the law and power that propels the blood. Though ministering to the ills of the honest folk in a far-away piney town, the doctor is a graduate of Vienna, and this fact adds luster to his idea. In short, he affirms that the heart does not move the blood or force its circulation; that the air one breathes is the incentive to blood action, and that the heart relatively acts as a mere governor of a machine.

Dr. Rodermund is evidently bold and sincere, for he wrote the following to a Chicago member of the profession who asked for a full explanation of his theory:

Dear Doctor: I am pleased that a few persons are at least becoming interested in the subject of my theory of the circulation of the blood. Of course I cannot expect to have my theory accepted in such an important matter, inasmuch as I am the first physician that ever framed such an idea. As I am not known—that means skepticism. Well, I think that will prove good in the end, for I did not want

or during any hot weather? Because you do not get the force and power of the circulation of the blood. For the lack of quality or of oxygen in the air the pulse will be found weaker, not having the volume nor force as in clear or cold weather.

"The reason people suffocate by gas in a room, or when packed in a closed room, or in a room filled with smoke, is from want of oxygen and not from the gases, as formerly supposed, although the smoke or gases are responsible for the disappearance of the oxygen."

"Another practical illustration is, when cutting the arteries of the necks of bullocks in a slaughter house without cutting the trachea, and when the animals have nearly bled to death, the blood running leisurely, they often make several strong efforts to breathe when the pulsation and spurting of the blood will renew with activity."

"Another strong argument that the heart cannot propel the blood is that size (all other things being equal) is a measure of power. It is estimated that the heart in order to accomplish the task of propelling the blood to all parts of the body exerts a power at every pulsation equal to fifty pounds, varying in different persons according to health, labor, etc. This would be equal to 200,000 pounds every hour awake and asleep—and this would mean that the heart puts forth energy sufficient to raise its own weight 20,000 feet every hour—where an active pedestrian climbing a mountain can raise himself only about one-twentieth of that distance. These estimates refute themselves."

"That it is some tremendous force that does send the blood through the arteries is easily seen by its spurting for yards when an artery is cut; but that the heart and blood vessels could withstand all this dynamic pressure from birth until death is impossible."

"What machinery could withstand all this terrible strain? Had we not better look about us and see if nature has not provided some other means more rational, less liable to derangement, not contradicted by every law of dynamics? This tremendous power necessary to the circulation of the blood is the same as that which furnishes the motive power throughout universal nature. It is furnished through the lungs by the air we breathe."

"Instead of the blood carrying oxygen through the system, it is the oxygen from the air that sends the blood bounding through all the minute capillary blood vessels, exactly reversing the old theory that has been believed by us for nearly three centuries. In other words, it is the oxygen we breathe based on the fundamental law of electricity."

## SHE IS STRONG MINDED.

Dr. Anita Newcomb McGee, the first woman to be regularly sworn in as an officer of the United States army, took a prominent part in the Cuban campaign as head nurse under the medical department, and is now acting assistant surgeon. This philanthropic woman is highly cultured in the arts and sciences. She is the daughter of the distinguished Professor Simon Newcomb, the astronomer, and her mother is Mary C. Hassler, who was daughter of Dr. C. A. Hassler of the navy. Miss Newcomb studied first in the United States and then at Cambridge and in the University of Geneva. She mastered the theory and practice of medicine, and after her marriage she studied sociology and won much praise for her work in that field. She is a fellow of the American Association for the Advancement of Science and is one of the very few women who have read papers before that learned body. Dr. McGee

to spring a fad on the profession or the world. The profession now rests on a foundation of fads and will be written about in the future as a great humbug. I mean medicine—not surgery. I claim and can demonstrate that internal medicine can be as accurate as surgery, and hope to live to see a revolution in our practice. But I fear it will have to proceed from the pressure of public opinion.

Most M. D.'s don't care. All the interest they have is expressed in the thought, "How much can I make out of it," which creates dishonesty. A few have integrity with progressive intentions.

Study and test this subject of the circulation. You will be delighted to find it correct every time. It is a universal law. I have been trying to prove during four years that I was wrong, but the tests never failed.

It is nearly 300 years since Harvey demonstrated that the blood circulates in the blood vessels. During these centuries all teachers on the subject of physiology have maintained that the heart was a pump and by its muscular contraction propelled the blood throughout the body.

Dr. Rodermund insists that this theory is absurdly false, and an absolute physical impossibility.

According to his thesis the heart has no more to do with the propelling of the blood through the arteries than the stomach or liver.

"I am convinced," he writes, "that the power which propels the blood is received through the lungs and not performed by the heart. My first forcible thought that the heart does not propel the blood was in observing the pulse of sick people. We find in the sick that the weaker the patient and the weaker the action of the heart the faster the circulation. Again, we have a very quick circulation of the blood where the pulse is as full and strong as in the healthy subject. Take, for instance the circulation in children. The younger or more delicate the child the faster the circulation. Tracing these well known facts to foetal life, it is still faster, but at the birth of an infant we can notice several changes that are strong and incontestible evidence in demonstrating the power that propels the blood."

"The lungs of the new-born child are charged by air pressure. This air pressure is about 2,000 pounds to every square foot of the body's surface, and by breathing the lungs stay charged from birth until death."

"Another proof of the power that propels the blood is furnished by holding the breath. The longer you hold the breath the slower and feebler the pulsation becomes in every single person, well or sick. Try it on yourself, but not too long, and note the slowing of the pulse, and see how full and bounding the circulation becomes after taking a few inspirations of pure air. In many instances the rate of the pulse will increase from seven to twelve beats, besides being much stronger."

"By suddenly cutting off the breathing, as by hanging or drowning, the pulse beat keeps up full for a few moments, but gradually becomes feebler, and as the lung cells become exhausted of their air supply the circulation stops and life is extinct."

"Why do you feel so sluggish in muggy weather, just before a storm

Antiquity of Dice.

The origin of dice is buried in romance and mystery. They have been used in religious ceremonies from time immemorial. Dice have been used in all earlier forms of worship to find out the future by divine aid and guidance. The variety of the world's dice is surprising, but practically may be divided into two kinds. One kind is cubical, represented by our ordinary dice. With two exceptions—Korean and Etruscan—the spots are arranged so that the six and one, five and two, and three and four are opposite, making the sum of the opposite sides invariably seven. This is the dice not only of modern Europe and America, but of the classical Greece and Rome, of Syria, Persia, India, China, Japan, Burma and Siam. The other principal kind of dice is the long square prism, also marked with "dice eyes," found scattered among prehistoric remains in Europe and existing today in India and adjacent countries. With these dice must also be classed the top or spinning dice, with four or six edges, which are twirled with the fingers. The oldest dice is from Naucratis, a Greek colony 600 B. C. Only two specimens of dice have been discovered at Babylon. No name for dice has yet been found in the cuneiform writings.—San Francisco Post.

## Many Towns Want McKinley.

Washington, Sept. 30.—Many cities not heretofore considered wish to be included in the itinerary of the president's trip west in connection with the Omaha exposition. With the outlining of the plans for the trip, invitations of a most urgent character, both by telegram and by letter, have been dispatched to the president in the interests of those anxious to entertain him. Mr. McKinley, however, has planned to spend only a fortnight away from Washington, and this will necessitate a reluctant declination of numerous invitations.

## Vatican Wants Guaranty.

New York, Sept. 30.—A dispatch to the Herald from Madrid says: The papal nuncio had a conference with the minister of the colonies at which the former urged the desires of the vatican that in the Spanish territories which had become American the goods of the church be guaranteed and the position of the church defined. The minister said he would specially refer the matter to the Paris commission, whose members would be instructed to do all that was possible.

Philadelphia, Sept. 30.—Nearly three thousand carpet weavers have been thrown out of employment in this city because of the action of the ingrain carpet spinners, who decided a few days ago to shut down this branch of their business. For some time the spinners have been turning out yarn twice as fast as the weavers could consume it and this forced the price down to such an extent that it was deemed advisable to close down for a time.

## Commercial Treaty with Spain.

New York, Sept. 30.—A special to the Herald from Madrid says: Sagasta has made the following statement to Senor Brunet, representing the chamber of commerce of Catalonia: "I hope to obtain commercial advantages from the United States, to be embodied in the definite treaty of peace maintaining the status quo."

## Assured of Good Offices.

## Veteran Illinois Congressman Blind.

## McKinley Will Be Here.

Washington, Sept. 30.—A delegation from Philadelphia, headed by Mayor Warwick, formally invited President McKinley to attend the peace jubilee celebration to be held in that city Oct. 26 and 27. The president accepted the invitation.

## OF LOCAL INTEREST.

## Some People We Know and We Will Profit By Hearing About Them

This is a purely local event. It took place in Janesville. Not in Buffalo or New York. You are asked to investigate it. Asked to believe a citizens word. To confirm a citizens statement. Any article that is indorsed at home.

That obtains resident advocates. Is more worthy of confidence. Than a far off foreign article. Testified to by unknown people.

Mrs. L. B. Canfield, of 107 Cornelia street, says: "I doctored from time to time for the last eight or ten years for kidney complaint. I felt fairly well as long as I took medicines, but if I left off I immediately became worse. At one time I had such a severe attack that I came near dying. The pain became so severe that it brought on nervous chills, my finger nails turned purple and I never suffered so much in my life. The medicine I took seemed to act as a stimulant while I used it, and I finally recovered in a measure. During the last three years I suffered from attacks of headache, dizziness and backache. It was for these reasons, that on learning about Doan's Kidney Pills, I procured them from the Janesville Co's. drug store and I can say they are a splendid remedy. The pain in the region of my kidneys was removed in a short time and since completing the treatment I have felt better generally. Doan's Kidney Pills for sale by all dealers. Price 50 cents. Buggies That  
Live Long.

No one ever saw a buggy that wouldn't wear out sometime, but the Taylor Buggies have as long a life as any rig manufactured. Some people say that a Taylor rig will outwear three ordinary makes.

People who have used the Taylor rigs say they would never ride in any other make. Of course people's opinions differ. Some people who know nothing about Taylor Buggies might say that they would prefer some other make.

A Janesville gentleman said a few days ago that he had ridden in Taylor rigs for the past six years and would never use any other. They are easy riding, very comfortable and will wear like iron. A good many people have said the same thing about the Taylor Buggies. We know somebody is saying good things about our rigs, because we are getting new customers every day.
